## Strongid Paste

**STRONGID® (pyrantel pamoate) Paste is a potent equine wormer.**

An effective treatment for the removal and control of mature infections of large strongyles, small strongyles, pinworms and large roundworms in horses and ponies.

**Active Ingredient:** Pyrantel pamoate--formula contains **43.9 mg** of pyrantel base as pyrantel pamoate per mL.

**Dosage for horses:** Single oral dose of 3 mg pyrantel base per lb of body weight. One syringe treats 1,200 lbs. Each syringe contains 20 mL paste.

*Since this product is 20 mL of paste for a 1200 lb. horse per syringe, this would be hard to get a small enough quantity to be a correct dosage for a skunk. There are much safer products as noted above.*
