

SkunkHaven uses and recommends Rep-Cal

(shown on the top in the photo below) **for your skunk's bone health. It contains the calcium and Vitamin D₃ your skunk needs for strong, healthy bones.**

If you are using either of the two products shown on the bottom row in the photo above...

STOP!!!

Skunks given these products have been shown to develop bone density loss / bone depreciation, causing their bones to become weak and brittle, and break easily.
